

Course Outcome:

BSC (computer science)

F.Y.BSC (CS)

On completion of the course, student will be able to:

- Design and implement 'C' programs for simple problems.
- Writing C programs using complex data structures such as pointers, structures etc.
- Test, debug and execute programs.
- understand basic logic gates, Boolean algebra and K-maps

S.Y BSC (CS)

On completion of the course, student will be able to:

- Differentiate the usage of various structures in problem solution.
- Implementing algorithms to solve problems using appropriate data structures.
- Prepare the SRS, Design document, Project plan of a given software system.

T.Y.BSC (CS)

On completion of the course, student will be able to:

- Understand Complexity of Operating system as software.
- Study the Turing machine and classes of problems.
- Understand design issues of a lexical analyzer and use of Lex tool.
- Learn basic networking hardware and tools.

BBA(CA)

F.Y.B.B.A(CA)

On completion of the course, student will be able to:

- Acquaint the students about accounting software packages.
- Make students familiar with information technology and improve job seeking skills.
- Equip the students to understand the impact that individual, group & structures have on their behavior within the organizations.
- Understand the power of excel spreadsheet in computing summary statistics.
- Understand basic concept of HRM & OB.

S.Y.B.B.A(CA)

On completion of the course, student will be able to:

- Study data security and its importance.
- Study client server architecture.
- Build C++classes using appropriate encapsulation and design principles.
- Apply object oriented or non-object oriented techniques to solve bigger computing problems.

T.Y.B.B.A(CA)

On completion of the course, student will be able to:

- Study web components for developing web applications.
- Learned to work with MongoDB shell and MongoDB tools
- describe the process of developing mobile applications.
- Comprehend Software Project Management Concepts.
- Have a good understanding of Cyber Security and the Tools.

MSC (CS)

F.Y.MSC (CS)

On completion of the course, student will be able to:

- Make the student capable of making a choice of what database technologies to use, based on their application needs.
- Understand cloud security issues and solutions.
- Understand the numerous applications and huge possibilities in the field of AI that goes beyond the normal human imagination.
- learn how to implement and deploy web service client and server

## S.Y.MSC (CS)

On completion of the course, student will be able to:

- Determine how to Leverage social media for better services and understand usability.
- Study & Design various case studies using big data tools/commands and analyze it.
- Ready with the technology which is used widely in Industry as a part of full stack developer.
- Build and deploy robust Django Web App.

## MSC (CA)

### F.Y.MSC (CA)

On completion of the course, student will be able to:

- Select the appropriate algorithm by doing necessary analysis of algorithms.
- Learn c# fundamentals.
- Web-sites using .NET framework.
- Design a responsive web site using HTML5 and above, CSS3 and above and XML.
- Have a broad understanding of database concepts and database management system software.
- Study and to control the behavior of OS by writing Shell scripts.

## BBA

### FYBBA

On completion of the course, students will be able to:

- Understand modern business practices, forms, procedures and functioning of various business organizations.
- Develop skills of effective communication - both written and oral.
- Help students to acquaint with application of communication skills in the business world.
- Use the concept of EMI.

### SYBBA

On completion of the course, students will be able to:

- Understand Warehousing and its role in Space Management.
- Build self-confidence, enhance self-esteem, and improve overall personality of the students.
- Understand the development issues related to rural society.
- Study recent technology in banking industry.

## TYBBA

On completion of the course, students will be able to:

- Help students to up bring out their own business plan.
- Understand basic legal terms and concepts used in law pertaining to business.
- Inculcate in depth knowledge of services as an essential economic activity.

## BBA (IB)

### FYBBA (IB)

On completion of the course, students will be able to:

- Understand basic concept regarding org. Business Administration.
- Develop rational understanding regarding concept of cost expenditure in business.
- Understand the practical applications of trade theories and its contribution.

## SYBBA (IB)

On completion of the course, students will be able to:

- Introduce the recent trends with respect to global HRM.
- Build positive personality traits.
- Analyze the International Investment and risks associated with it.

## TYBBA (IB)

On completion of the course, students will be able to:

- Develop managerial skills among the students.
- Know at length about socio-cultural and trade realtions.
- Understand basic concepts related to international business laws.
- Understand the principles of currency values.
- Understand the basic factors of international financial system.

## BCOM

### FYBCOM

On completion of the course, students will be able to:

- Develop logic and quantitative thinking.
- Impart knowledge of basic accounting concepts.
- Impart knowledge of business economics.
- Develop the organizational skills.

### SYBCOM

On completion of the course, students will be able to:

- Develop business communication skills through the application and exercises.
- Introduce the various concepts of National Income.
- Provide an understanding about various functions of management.

### TYBCOM

On completion of the course, students will be able to:

- Understand the emerging issues relating to e-commerce, e-transaction issues and E contracts.
- Analyze economic development process of India.
- Know the various new concepts in computerized system and Forensic Audit.

## MCOM

### FY MCOM

On completion of the course, student will be able to:

- Enable students to acquire sound Knowledge of concepts, methods and techniques of management accounting
- Acquaint the students with the knowledge about strategies adopted by corporate world
- Study the basic concepts of Industrial Economics.
