Participative Learning

Talking Tree

People will receive detailed information about the tree species after scanning the code with their mobile devices. In one of a kind move, we have pasted a QR code on each tree to make it easier to learn about the trees. People and Students will receive detailed information about the tree species after scanning the code with their mobile devices. An easy access for making learning effective. Anyone who scans the QR code from a mobile will get information about respective trees

2) Precitech Industries:

The challenging opportunities and new avenues cropping up in the corporate arena in diverse sectors demands the role of a common mediator to act as bridge between buyers and sellers, importers and exporters, and the like. This service facilitates all in the business world to come to a common platform, thus turning the geologically colossus earth into a tiny global village. Tradeindia is a major entity involved in this task bringing manufacturers, buyers and sellers under one pedestal.

Infocore Network Ltd. got established in the year 1990 and is identified by people at large as tradeindia.com thanks to our very popular B2B website of the same name. Launched in the year 1996 to offer the Indian Business community a platform to promote themselves globally tradeindia.com has created a niche as India's largest B2B marketplace, offering comprehensive

Industrial Visit Report

- Date Of Visit -11 January 2020 to 16 January 2020.
- Companies' Names- 1) Gems Gallery International Manufacturer.
2) Siam Steel Syndicate Public Company Ltd.
- Address of Companies- Bangkok ,Thailand.
- Companies name – Aditya Engineering, Cotton King, Krishi Vigyan Kendra Industry.
- Address of Companies –India.

Aim of the visit:

This visits aim to provide exposure to students to gain knowledge and first-hand opportunity to visit Industries, Universities, Manufacturing units, Sea port and Airport in progressive economies, which enables them to learn the cross cultural management practices, comparative analysis of the business phenomenon and opportunities in various countries. International awareness and international exposure during the formative years results in more refined individuals, encouraging the students to see things from different perspectives and helping them to make informed decisions, acquiring transferable skills that will be useful to build a career and will remain with them for life. Local industrial visit was also conducted at Aditya Engineering, Cotton King, Krishi Vigyan Kendra Industry.

Objective of Industrial Visit:

- To provide a unique experience to the students and exchange and share good practices which could be replicated to improve the efficiency, production and competency in their respective field of study.
- To provide exposure to students at global level which enables them to learn the cross cultural management practices, comparative analysis of the business phenomenon and opportunities in various countries.
- To also help accompanying teachers who benefit from the exchange of practices, knowledge and expertise during the visits to industries abroad.

Analysis of Algorithms

An Algorithm is a sequence of steps to solve a problem. Analysis of Algorithm is very important to solve different types of problems in the branch of computer science and information technology.

In theoretical analysis of algorithms, it is common to estimate their complexity in the asymptotic sense, i.e., to estimate the complexity function for arbitrarily large input. The term "analysis of algorithms" was coined by Donald Knuth.

Algorithm analysis is an important part of computational complexity theory, which provides theoretical estimation for the required resources of an algorithm to solve a specific computational problem. Most algorithms are designed to work with inputs of arbitrary length. Analysis of algorithms is the determination of the amount of time and space resources required to execute it.

Usually, the efficiency or running time of an algorithm is stated as a function relating the input length to the number of steps, known as **time complexity**, or volume of memory, known as **space complexity**.

The Need for Analysis:

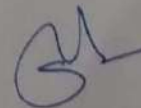

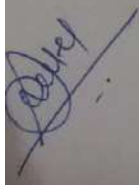

In this chapter, we will discuss the need for analysis of algorithms and how to choose a better algorithm for a particular problem as one computational problem can be solved by different algorithms.

By considering an algorithm for a specific problem, we can begin to develop pattern recognition so that similar types of problems can be solved by the help of this algorithm. Algorithms are often quite different from one another, though the objective of these algorithms are the same. For example, we know that a set of numbers can be sorted using different algorithms. Number of comparisons performed by one algorithm may vary with others for the same input. Hence, time complexity of those algorithms may differ. At the same time, we need to calculate the memory space required by each algorithm.

Analysis of algorithm is the process of analyzing the problem-solving capability of the algorithm in terms of the time and size required (the size of memory for storage while implementation). However, the main concern of analysis of algorithms is the required time or performance. Generally, we perform the following types of analysis –

- **Worst-case** – The maximum number of steps taken on any instance of size a .
- **Best-case** – The minimum number of steps taken on any instance of size a .
- **Average case** – An average number of steps taken on any instance of size a .
- **Amortized** – A sequence of operations applied to the input of size a averaged over time.

To solve a problem, we need to consider time as well as space complexity as the program may run on a system where memory is limited but adequate space is available or may be vice-versa. In this context, if we compare **bubble sort** and **merge sort**. Bubble sort does not require additional memory, but merge sort requires additional space. Though time complexity of bubble sort is higher compared to merge sort, we may need to apply bubble sort if the program needs to run in an environment, where memory is very limited.

Web Mining

What is web mining?

The process of discovering knowledge from web page content, hyperlink structure, and usage data. Builds on existing data and text mining techniques, but adds many new tasks and algorithms. The web is unique! Web reflects a virtual society --- interactions among people, organizations, and automated systems, no longer limited by geography.

The purpose of Web mining is to develop methods and systems for discovering models of objects and processes on the World Wide Web and for web-based systems that show adaptive performance. Web Mining integrates three parent areas:

Data Mining (we use this term here also for the closely related areas of Machine Learning and Knowledge Discovery), Internet technology and World Wide Web, and for the more recent Semantic Web. The World Wide Web has made an enormous amount of information electronically accessible. The use of email, news and markup languages like HTML allow users to publish and read documents at a world-wide scale and to communicate via chat connections, including information in the form of images and voice records. The HTTP protocol that enables access to documents over the network via Web browsers created an immense improvement in communication and access to information. For some years these possibilities were used mostly in the scientific world but recent years have seen an immense growth in popularity, supported by the wide availability of computers and broadband communication. The use of the internet for other tasks than finding information and direct communication is increasing, as can be seen from the interest in e- activities such as e-commerce, e-learning, e-government, e-science. Independently of the development of the Internet, Data Mining expanded out of the academic world into industry. Methods and their potential became known outside the academic world and commercial toolkits became available that allowed applications at an industrial scale. Numerous industrial applications have shown that models can be constructed from data for a wide variety of industrial problems. The World-Wide Web is an interesting area for Data Mining because huge amounts of information are available.

Data Mining methods can be used to analyze the behavior of individual users, access patterns of pages or sites, properties of collections of documents.

What is data mining? Data mining is also called knowledge discovery and data mining (KDD). Data mining is extraction of useful patterns from data sources, e.g., databases, texts, web, images, etc. Patterns must be: valid, novel, potentially useful, understandable.

Classic data mining tasks **Classification:** mining patterns that can classify future (new) data into known classes. **Association rule mining** mining any rule of the form $X \rightarrow Y$, where X and Y are sets of data items. E.g., Cheese, Milk \rightarrow Bread [sup =5%, confid=80%] **Clustering** identifying a set of similarity groups in the data **Sequential pattern mining:** A sequential rule: $A \rightarrow B$, says that event A will be immediately followed by event B with a certain confidence.

OLAP (On-Line Analytical Processing)

The term On-Line Analytical Processing (OLAP) was coined by E.F. Codd in 1993 to refer to a type of application that allows a user to interactively analyze data. An OLAP system is often contrasted to an OLTP (On-Line Transaction Processing) system that focuses on processing transaction such as orders, invoices or general ledger transactions. Before the term OLAP was coined, these systems were often referred to as Decision Support Systems.

OLAP is now acknowledged as a key technology for successful management in the 90's. It describes a class of applications that require multidimensional analysis of business data.

OLAP systems enable managers and analysts to rapidly and easily examine key performance data and perform powerful comparison and trend analyses, even on very large data volumes. They can be used in a wide variety of business areas, including sales and marketing analysis, financial reporting, quality tracking, profitability analysis, manpower and pricing applications, and many others. OLAP technology is being used in an increasingly wide range of applications. The most common are sales and marketing analysis; financial reporting and consolidation; and budgeting and planning. Increasingly, however OLAP is being used for applications such as product profitability and pricing analysis; activity based costing, manpower planning; quality analysis, in fact for any management system that requires a flexible, top down view of an organization.

Online Analytical Processing (OLAP) is a method of analyzing data in a multidimensional format, often across multiple time periods, with the aim of uncovering the business information concealed within the data'- OLAP enables business users to gain an insight into the business through interactive analysis of different views of the business data that have been built up from the operational systems. This approach facilitates a more intuitive and meaningful analysis of business information and assists in identifying important business trends.

OLAP is often confused with Data Warehousing. OLAP is not a data warehousing, methodology, however it is an integral part of a data warehousing solution. OLAP comes in many different shades, depending on the underlying database structure and the location of the majority of the analytical processing. Thus, the term OLAP has different meanings depending on the specific combination of these variables.

OLAP can be defined as the process of converting raw data into business information through multi-dimensional analysis. This enables analysts to identify business strengths and weaknesses, business trends and the underlying causes of these trends. It provides an insight into the business through the interactive analysis of different views of business information that have been built up from raw operating data which reflect the business users understanding of the business.

Machine Learning

Clustering in Machine Learning

1] What is Machine Learning?

- **Machine learning (ML)** is the study of computer algorithms that improve automatically through experience.[1] It is seen as a part of artificial intelligence. Machine learning algorithms build a model based on sample data, known as "training data", in order to make predictions or decisions without being explicitly programmed to do so.[2] Machine learning algorithms are used in a wide variety of applications, such as email filtering and computer vision, where it is difficult or unfeasible to develop conventional algorithms to perform the needed tasks.
- **Clever** : Machine Learning can review large volumes of data and discover specific trends and patterns that would not be apparent to humans. For instance, for an e-commerce website like Amazon, it serves to understand the browsing behaviors and purchase histories of its users to help cater to the right products, deals, and reminders relevant to them. It uses the results to reveal relevant advertisements to them.
- **Autonomous** : With ML, you don't need to babysit your project every step of the way. Since it means giving machines the ability to learn, it lets them make predictions and also improve the algorithms on their own. A common example of this is anti-virus softwares; they learn to filter new threats as they are recognized. ML is also good at recognizing spam.
- **Upgradable** : As ML algorithms gain experience, they keep improving in accuracy and efficiency. This lets them make better decisions. Say you need to make a weather forecast model. As the amount of data you have keeps growing, your algorithms learn to make more accurate predictions faster.
- **Versatility** : Machine Learning algorithms are good at handling data that are multi-dimensional and multi-variety, and they can do this in dynamic or uncertain environments.
- **Wide Applications** : You could be an e-tailer or a healthcare provider and make ML work for you. Where it does apply, it holds the capability to help deliver a much more personal experience to customers while also targeting the right customers.
- **Scalable** : ML algorithms are easily scalable and mostly resources are autoscaled by the algorithms as they gain experience.

2] What is Clustering?

- Clustering is the most popular technique in unsupervised learning where data is grouped based on the similarity of the data-points. Clustering has many real-life applications where it can be used in a variety of situations. The basic principle behind cluster is the assignment of a given set of observations into subgroups or clusters such that observations present in the same cluster possess a degree of similarity. It is the implementation of the human cognitive ability to discern objects based on their nature.

Report on National Pollution Control Day

Date: 2nd December 2021

Time: 10.00 AM – 12.00 noon

Platform: Google Meet, Google Form

Brief details of the event -

BRACT's, Vishwakarma College of Arts, Commerce and Science, Pune, conducted a PPT Presentation Competition on 2nd December 2021 On the Occasion of National Pollution Control Day.

Objective of the event –

- To raise awareness about the importance of pollution control measures among the students.
- To educate students on how to prevent pollution.

Summary -

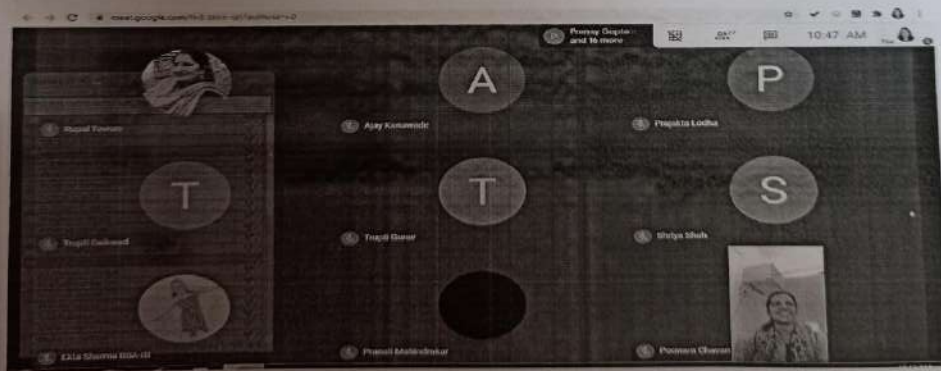

National Pollution Control Day is celebrated on 2nd December to raise awareness about pollution and its hazardous effects. This day is observed in the memory of the people who lost their lives in the Bhopal gas calamity and is considered as one of the biggest industrial disasters. The day aims to bring awareness to students about prevention of air, soil, noise, and water pollution.

The session started with an Introduction to the idea behind National Pollution Control Day. The brief history of Bhopal Gas tragedy is shared and remembrance of those who lost their lives in this tragedy when the deadly gas methyl isocyanate leaked out of the Union Carbide plant on the intervening night of December 2-3 in 1984. The effects of that disaster are felt even now after more than 35 years.

This year's PPT presentation theme for the Pollution Control Day is 'the importance of pollution control measures' and 'how to prevent pollution'. We have received good response to this competition. Under this competition, Students has to prepare and submit their PPT's on the given Google form link in given time. A

total of 29 students registered and submitted their PPT's. The best entries were awarded with E-certificates.

Subject: Principles of Digital Electronics
Date: 26/9/2017

Paper No: ELC - 102
Time: 4 - 5 pm.

Q. 1. Attempt any six of the following

[2 X 6 = 12 Marks]

- 1) Convert $(396)_{10} = (?)_{\text{Excess-3}}$.
- 2) Convert binary 1011 to gray.
- 3) Convert the Following Binary Numbers to Gray Code: 1) 01011 2) 11010.
- 4) Convert the Following in to gray code: 1) $(23)_8$ 2) $(23)_{10}$.
- 5) Convert $(1001)_2 = (?)_{\text{Gray}}$.
- 6) Differentiate BCD and ASCII Code.
- 7) Convert $(1001)_{\text{BCD}}$ to Excess-3 Code.
- 8) Draw a Circuit Symbol for : 1) NAND gate 2) NOR gate

Q. 2. Attempt any Two (Out of Three)

[4 X 2 = 8 Marks]

- (1) State and Prove De-Morgan's Theorems.
- (2) Explain the Basics Gates. Specify its symbol and write its truth table.
- (3) Prove that Following: 1) $(A+AB)=A$ 2) $(A+B)(A+C)=A+BC$

Subject : Database Administration

Title : Assignment - 5 (Linux)

Name : Aman Dhaliker

Roll No. : 7106

Batch :

Date : 17-18

Date :

(Performance)

(Submission)

Explain the concept of users & groups:

(i) primary and secondary group

(ii) Create a new user: useradd or adduser

Linux users can be added via the useradd or adduser commands. Note that useradd is the native binary associated with Linux systems, whereas useradd is a Perl script that uses said binary in its backend. Both commands share functionality, but some say adduser is more user-friendly. Using the adduser command, let's create a new user: foobar.

1 [sudo] password for user:

2 Adding new user foobar:

3 Adding new group foobar (1001):

4 Adding new user foobar (1001) with group foobar:

5 Creating home directory /home/foobar:

We see that the user, foobar, was assigned the primary group, foobar, by default.

(2) Get user ID and groups information: id and groups

To show all the user information & group memberships, we can use the id command:

1 \$ id foobar

2 uid=1001(foobar) gid=1001(foobar) groups=1001(foobar)

1 \$ id 2 1001(foobar) gid=1001(foobar) groups=1001(foobar)

Here the gid, or group ID, is the primary user group & groups is the secondary group. We could also get the user's groups with the groups command:

1 \$ groups foobar

Individual storage engines might create their own threads, and replication uses threads.

(2) Grant table buffers. The grant tables store information about MySQL user accounts & the privileges they have. The server loads a copy of the grant tables into memory for fast access. Control checking client access is checked for every query, so looking up privilege information in memory rather than from the grant tables on disk results in a significant reduction of disk access overhead.

(3) A key buffer holds index blocks for MyISAM tables. By caching index blocks in memory, the server often can avoid reading index contents repeatedly from disk for index-based retrievals & other index-related operations such as sorts.

Analysis of Algorithms

An Algorithm is a sequence of steps to solve a problem. Analysis of Algorithm is very important to solve different types of problems in the branch of computer science and information technology.

In theoretical analysis of algorithms, it is common to estimate their complexity in the asymptotic sense, i.e., to estimate the complexity function for arbitrarily large input. The term "analysis of algorithms" was coined by Donald Knuth.

Algorithm analysis is an important part of computational complexity theory, which provides theoretical estimation for the required resources of an algorithm to solve a specific computational problem. Most algorithms are designed to work with inputs of arbitrary length. Analysis of algorithms is the determination of the amount of time and space resources required to execute it.

Usually, the efficiency or running time of an algorithm is stated as a function relating the input length to the number of steps, known as **time complexity**, or volume of memory, known as **space complexity**.

The Need for Analysis:

In this chapter, we will discuss the need for analysis of algorithms and how to choose a better algorithm for a particular problem as one computational problem can be solved by different algorithms.

By considering an algorithm for a specific problem, we can begin to develop pattern recognition so that similar types of problems can be solved by the help of this algorithm. Algorithms are often quite different from one another, though the objective of these algorithms are the same. For example, we know that a set of numbers can be sorted using different algorithms. Number of comparisons performed by one algorithm may vary with others for the same input. Hence, time complexity of those algorithms may differ. At the same time, we need to calculate the memory space required by each algorithm.

Analysis of algorithm is the process of analyzing the problem-solving capability of the algorithm in terms of the time and size required (the size of memory for storage while implementation). However, the main concern of analysis of algorithms is the required time or performance. Generally, we perform the following types of analysis –

- **Worst-case** – The maximum number of steps taken on any instance of size a .
- **Best-case** – The minimum number of steps taken on any instance of size a .
- **Average case** – An average number of steps taken on any instance of size a .
- **Amortized** – A sequence of operations applied to the input of size a averaged over time.

To solve a problem, we need to consider time as well as space complexity as the program may run on a system where memory is limited but adequate space is available or may be vice-versa. In this context, if we compare **bubble sort** and **merge sort**. Bubble sort does not require additional memory, but merge sort requires additional space. Though time complexity of bubble sort is higher compared to merge sort, we may need to apply bubble sort if the program needs to run in an environment, where memory is very limited.

Carnival 2018

Winners of Quiz Competition

Congratulations

- 1st prize: - 1. Zeel Paresh Savla (SYBCA)
2. Ashlesha Avinash Harkal (TYBCA)
3. Muttanna Mahadev Gulgonda (SYBBA)
- 2nd prize: - 1. Kamran Noorsahab Shaikh (TYBSc)
2. Vikas Vinay Pandey (TYBSc)
3. Arbaz Mohammad Shaikh (TYBSc)

Note:- Remain present on prize distribution program and meet Prajкта Patil Madam.

ASSIGNMENT SUBMISSION NOTICE

Date : 7/ 1/2022	6/9/2018	
------------------	----------	--

All students are hereby inform that Assignment I Submission Schedule is as follows:

Sr. No.	Subject	Assignment Questions
1	Software Metrics and Project Managemt	1.Explain capability maturity model. 2.Explain revising the plan. 3.Explain configuration management. 4.What are the different aspects of size. 5.Define Fault,Failure.
2	Mobile Computing	1. Expalin any 5 fragments of Androide UI design. 2 .What is difference between FDMA and TDMA. 3 .Explain UMTC architecure. 4 .Explain WAP gateway in details. 5 .Explain IP packet delivery.
3	Soft Computing	1. Write short notes on-Pattern space and Weight space. 2.What are the salient properties and features of neural network. 3.Explain operators in GA. 4.Explain supervised learning and unsupervised learning. 5.Define artificial neural network.Explain architecure of neural network.
4	Web Services	1. What are the web services.state and expalin core building blocks of web services. 2. Explain structure of SOAP Communication model. 3. What is cloud computing.Describe various cloud deployment models. 4. Explain Categorization in UDDI. 5. Explain web service interface.
5	Business Intelligent	1.Describe the need for BI integration. 2.What are the limitations of on-demand system. 3.Explain in details alternative data warehouse architecture. 4.Short note on six sigma. 5.What are some of the benefits and challenges of Natural Language Processing.

Note :

1. It is considered for internal assessment.

2. Students should

be responsible for submitting the assignments.		
3.Submission date for all subjects- 10/9/2018

NAME:- ARYAN JAIN

CLASS:- FY. BBA (CA)

ROLL. NO:- 3081

SUBJECT:- ADVANCE

(PROGRAMMING

20-12-18 (2018-19)

1. Program to demonstrate nested structures.

```
#include<stdio.h>
#include<conio.h>
struct stud-Res
{
    int rno;
    char std[10];
    struct stud_Marks
    {
        char subj_nm[30];
        int subj_mark;
    }marks;
}results;
void main()
{
    clrscr();
    printf("\n\t Enter Roll Number: ");
    scanf("%d",&result.rno);
    printf("\n\t Enter Standard: ");
    scanf ("%s",result.std);
    printf("\n\t Enter Subject Code: ");
    scanf("%s",result.marks.subj_nm);
    print("\n\t Enter Marks: ");
```

```
scanf("%d",&result.marks.subj_mark);  
printf("\n\n\t Roll Number: %d", result.rno);  
printf("\n\n\t Standerd: %s",result.std);  
printf("\n\n\tSubject Code: %s",result.marks.subj_nm);  
printf("\n\n\t Marks: %d",result.marks.subj_mark);  
getch();  
}
```

Output:

Enter Roll Number: 1

Enter Standred: BCAII

Enter subject Code: SUB001

Enter Marks: 63

Roll Number: 1

Standard: BCAII

Subject code: SUB001

Marks:63

2. Program to add two distance entered by user. Measurement of distance should be in inch and feet.

```
#include <stdio.h>
```

```
struct Distance
```

```
{
```

```
    int feet;
```

```
    float inch;
```

```
};
```

```
int main()
```

```
{
```

```
    printf("1st distance\n");
```

```
    printf("Enter feet :");
```

```
    scanf("%d",&d1.feet);
```

```
    printf("Enter inch);
```

```
    scanf("%f",&d1.inch);
```

```
    printf("2nd distance\n");
```

```
    printf("Enter feet: ");
```

```
    scanf("%d",&d2.feet);
```

```
    printf("Enter inch:");
```

```
    scanf("%f",&d2.inch);
```

```
    sum.feet=d1.feet+d2.feet;
```

```
    sum.inch=d1.inch+d2.inch;
```

```
    if (sum.inch>12){ // If inch is greater than 12, changing it to feet.
```

```
++sum.feet;
sum.inch=sum.inch-12;
}
printf("Sum of distance=%d\'-%.1f\'",sum.feet,sum.inch);
/*nprinting sum of distance d1 and d2 */
return 0;
getch();
}
```

Output:

1st Distance

Enter feet: 12

Enter inch: 7.9

2nd distance

Enter feet: 2

Enter inch: 9.8

Sum of distance = 15' - 5.1"

1. Programming source code for bar.

```
#include <graphics.h>
#include <conio.h>
main()
{
    int gd = DETECT, gm;
    initgraph(&gd, &gm, "C:\\TC\\BGI");
    bar(100, 100, 200, 200);
    getch();
    closergraph();
    return 0;
}
```

Output:

2. Program to draw a circle

```
#include<graphics.h>
```

```
#include<conio.h>
```

```
main()
```

```
{
```

```
    int gd = DETECT, gm;
```

```
    initgraph(&gd, &gm, "C:\\\\TC\\BGI");
```

```
    circle(100, 100, 50);
```

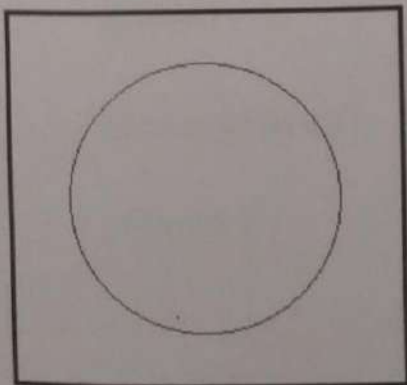

```
    getch();
```

```
    closergraph();
```

```
    return 0;
```

```
}
```

Output

3. Draw a emoji in C using Graphics.

```
#include<stdio.h>
#include<conio.h>
#include<graphics.h>
#include<dos.h>
int main()
{
    int gdriver=DETECT,gmode;
    initgraph(&gdriver,&gmode,"C:\\TC\\BGI");
    circle(300,200,170);
    circle(230,170,40);
    circle(390,170,40);
    circle(305,230,20);
    arc(230,170,0,180,55);
    arc(390,170,0,180,55);
    rectangle(250,280,360,320);
    getch()
    closergraph();
    return 0;
}
```

Output:

Scale

4. Program for Drawing concentric circles.

```
#include<graphics.h>

int main()
{
    int gd = DETECT, gm;
    int x = 320, y = 240, radius;
    initgraph(&gd, &gm, "C:\\\\TC\\\\BGI");
    for ( radius = 25; radius <= 125; radius = radius + 20)
        circle(x, y, radius);
    getch();
    closegraph();
    return 0;
}
```

Output:

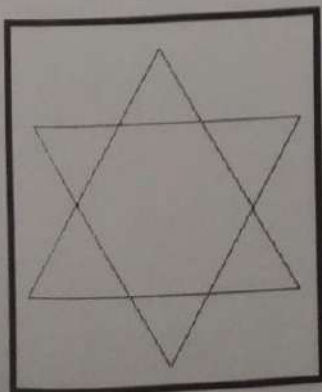

5. Program to draw a star.

```
#include<stdio.h>
#include<graphics.h>
#include<conio.h>
Void main()
(
    int gd=DETECT, gm;
    initgraph(&gd,&gm,"");
    line(150,100,100,200);
    line(100,200,200,200);
    line(200,200,150,100);
    line(100,125,200,125);
    line(100,125,150,225);
    line(150,225,200,125);
    getch();
    closegraph();
}
```

Notice

This to inform to all students of FYMSc(CS) that they have to submit Seminar Report for all subjects. Topics are given below. Select the one topic for each subject. Submit all reports on or before Tuesday, 17/12/2018.

Sr. No	Subject	Topic
1	Digital Image Processing	Image Acquisition
		Image Data Compression
2	Advanced Operating System	Operating system Security
		The History and Experience of system Programming
3	Data Mining and Data Warehousing	DW Bus Architecture
		Web Mining
4	Programming With DOT NET	ADO .Net
		Using .Net Framework
5	Artificial Intelligence	Game Theory
		Computer Vision and Perception
6	Advance Design and Analysis of Algorithms	Binary Search
		Belief Propagation Algorithm (BP)

Web Mining

What is web mining?

The process of discovering knowledge from web page content, hyperlink structure, and usage data. Builds on existing data and text mining techniques, but adds many new tasks and algorithms. The web is unique! Web reflects a virtual society --- interactions among people, organizations, and automated systems, no longer limited by geography.

The purpose of Web mining is to develop methods and systems for discovering models of objects and processes on the World Wide Web and for web-based systems that show adaptive performance. Web Mining integrates three parent areas:

Data Mining (we use this term here also for the closely related areas of Machine Learning and Knowledge Discovery), Internet technology and World Wide Web, and for the more recent Semantic Web. The World Wide Web has made an enormous amount of information electronically accessible. The use of email, news and markup languages like HTML allow users to publish and read documents at a world-wide scale and to communicate via chat connections, including information in the form of images and voice records. The HTTP protocol that enables access to documents over the network via Web browsers created an immense improvement in communication and access to information. For some years these possibilities were used mostly in the scientific world but recent years have seen an immense growth in popularity, supported by the wide availability of computers and broadband communication. The use of the internet for other tasks than finding information and direct communication is increasing, as can be seen from the interest in e- activities such as e-commerce, e-learning, e-government, e-science. Independently of the development of the Internet, Data Mining expanded out of the academic world into industry. Methods and their potential became known outside the academic world and commercial toolkits became available that allowed applications at an industrial scale. Numerous industrial applications have shown that models can be constructed from data for a wide variety of industrial problems. The World-Wide Web is an interesting area for Data Mining because huge amounts of information are available.

Data Mining methods can be used to analyze the behavior of individual users, access patterns of pages or sites, properties of collections of documents.

What is data mining? Data mining is also called knowledge discovery and data mining (KDD). Data mining is extraction of useful patterns from data sources, e.g., databases, texts, web, images, etc. Patterns must be: valid, novel, potentially useful, understandable.

Classic data mining tasks **Classification:** mining patterns that can classify future (new) data into known classes. **Association rule mining** mining any rule of the form $X \rightarrow Y$, where X and Y are sets of data items. E.g., Cheese, Milk \rightarrow Bread [sup =5%, confid=80%] **Clustering** identifying a set of similarity groups in the data **Sequential pattern mining:** A sequential rule: $A \rightarrow B$, says that event A will be immediately followed by event B with a certain confidence.

ANTAKSHARI COMPETITION

All students of VCACS are hereby informed that Antakshari Competition will be held on 31/12/2018 at 12:00 to 2:00 . Interested students should register their names to the Faculty members on or before 31/12/2018 till 4:00 pm.

Venue: 108

Antakshari Competition committee members:

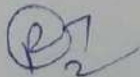

In-Charge : Rupali Taware

Members :

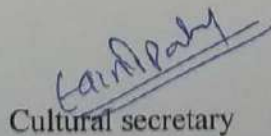

- 1) Komal Yadav
- 2) Madhura Thite
- 3) Snehal Pomah
- 4) Swapnil Chougule
- 5) Sudarshan Bhukele

Rules:

- ❖ ID card is compulsory.
- ❖ A team should consist of three members.
- ❖ Registered team members must be present 15 minutes before the competition otherwise that team will be disqualified.
- ❖ On the Spot Replacement of any team member is not allowed.
- ❖ The decision of the judges shall be final and binding on all teams.
- ❖ In case of a tie there shall be a additional round.

विश्वकर्मा कला, वाणिज्य व विज्ञान महाविद्यालय, कोंढवा, पुणे - ४८

राष्ट्रीय सेवा योजना अंतर्गत 'युवा सप्ताह' आयोजन अहवाल

दि. १८-०१-२०१८

महाविद्यालयात दिनांक १२/०१/२०१८ ते १८/०१/२०१८ या कालावधीत 'युवा सप्ताह' चे आयोजन करण्यात आले. या अंतर्गत, बुधवार दिनांक १७/०१/२०१८ रोजी विविध विषयांवरील चर्चासत्राचे आयोजन करण्यात आले. कार्यक्रमासाठी विश्वकर्मा इंस्टीट्यूट चे प्राध्यापक व रा.से.यो. चे कार्यक्रम अधिकारी डॉ.आर. एस. आचार्य सर, महाविद्यालयाचे प्राचार्य मा. डॉ.अ.आर.पाटील सर यांची प्रमुख उपस्थिती लाभली.

मा. आचार्य सर यांनी स्वामी विवेकानंदांचे विचार, त्यांचे व्यक्तिमत्व व आजचा युवक आणि राष्ट्रीय सेवा योजनेचे विद्यार्थी जीवनातील महत्व, अशा दोन्हीही विषयांवर मोलाचे मार्गदर्शन केले. तसेच महाविद्यालयाचे प्राचार्य मा. पाटील सर यांनीही स्वच्छ भारत, युवा शक्ती व त्यांचा वैज्ञानिक दृष्टीकोन अशा अनेक विषयांवर मार्गदर्शन केले.

कार्यक्रमाच्या पुढील भागात विद्यार्थ्यांनी व प्राध्यापकांनी पुढील विषयांवर आपले विचार मांडून चर्चासत्रात सहभाग घेतला :

१. स्वामी विवेकानंदांचे विचार व आजचा युवक
२. स्वच्छ व स्वस्थ भारत
३. प्लास्टिक कचरा निर्मूलन
४. आजची युवकांची बदलती विचारसरणी

चर्चासत्रात सहभागी विद्यार्थ्यांचे कौतुक व इतर विद्यार्थ्यांना प्रोत्साहन देण्यासाठी प्रातिनिधिक स्वरूपात गुणानुक्रम देण्यात आले, ते पुढीलप्रमाणे:

१. प्रथम क्रमांक : देशमुख अमोल : आजची युवकांची बदलती विचारसरणी (SYBBA - IB)
२. द्वितीय क्रमांक : बोदुल रोहन : स्वामी विवेकानंदांचे विचार व आजचा युवक (SY B.Com.)
५. या कार्यक्रमास विद्यार्थ्यांचा भरपूर प्रतिसाद मिळाला व या कार्यक्रमातून विद्यार्थ्यांना वरील विषयांवरील अनेक नवीन गोष्टी, आपली कर्तव्य व आजची युवकांची विचारसरणी, याबाबत मार्गदर्शन मिळाले. शिंदे सुवर्णा यांनी आभार प्रदर्शन करून कार्यक्रमाची सांगता केली.

Subject : 201 Cost Accounting

Q:1 Short Notes

1. Cost
2. Costing
3. Cost Accounting
4. Limitations of Financial Accounting

Q: 2 From the following figures ascertain -

A. Prime Cost B. Works Cost C. Cost of Production D. Total Cost E. Sales

Direct Materials Rs. 70,000; Direct Wages Rs. 50,000; Direct Expenses 50% of direct wages; Factory overheads Rs. 60,000; Administration overhead Rs. 40,000; Selling and Distribution overheads Rs. 20,000; Sales is 25% on total cost.

Q.3 The following figures have been extracted from the books of ABC Co. Ltd. for the year ended 31.3.2019.

Direct material 70,000	Direct wages 75,000
Indirect Wages 10,000	Other direct expensed 15,000
Factory rent and rates 5,000	Office rent and rates 500
Indirect Materials 500	Depreciation of plant 1,500
Depreciation of office furniture 100	Managing Director's remuneration 12,000
General factory expenses 5,700	General Office Expenses 1,000
General Selling expenses 1,000	Travelling Expenses 1,100
Office salaries 4,500	Carriage outward 1,000
Advertisements 2,000	Sales 2,50,0000

From the above figures calculate

i. Prime cost ii. Works cost, iii. Cost of Production, iv. Cost of sales, v. Net profit

Subject : 202 Origin and Development of Global Business

1. Explain the Concept of Globalization.
2. Deference between International and Domestic Business.
3. Explain the WTO and IMF with Its Objectives and Functions.
4. Concept of World Bank.
5. Concept of UNCTAD.

Subject : 203 Commercial Geography

Write Short Notes on:

1. Nature of Commercial Geography
2. Scope of Commercial Geography
3. Importance of study of Commercial Geography
4. Substantial Development
5. Geographical Indication
6. Sectors in the Economy

Subject : 204 Principles of Marketing

Q1) Define Marketing and explain functions of Marketing.

Q2) Define Services and elaborate different services offered in consumer market.

Q3) Short Notes

- a. Duties and responsibilities of Marketing Manager
- b. Rural marketing

Subject : 205 Business Statistics

- 1) Define i) Attribute ii) Variable iii) Discrete variable iv) Continuous variable.
- 2) Draw less than cumulative frequency curve.

Marks	0-20	20-40	40-60	60-80	80-100
No. of students	2	18	42	29	5

- 3) Find median for the following frequency distribution.

X	5	6	7	8	9	10
f	8	10	9	6	5	4

- 4) The mean of 100 items was 50. Later on it was discovered that 18 was misread as 80. Find correct mean.

Subject: 206 Fundamentals of Computers

- Q1) What is computer? Explain the types of computer.
- Q2) What is operating system? Explain its any two types.
- Q3) Short Notes
 - a. Cyber Security
 - b. Network Topology

NOTE:

1. All assignments to be written in the Journal provided by College - according to subject codes.
2. The submissions to be done in First week of January 2020, notice will be put on the Board.
3. Along with the submissions Oral Examination for the respective subjects will be conducted by subject teacher.

Kondhwa(Bk.), Pune-411 048.

Name :- Pinky . Pavan . Pardeep

Roll no :- 6095

subject :- CS II DBMS

course :- FYBSc (CS) (19-20)

Assignment No :- 2.

Q-1] Explain Record Based Logical data model.

⇒ Record based logical data model :-

This model is also used to describe data at logical & view level. It is used to describe the logical structure of database in terms of records. This model provides a higher level description of implementation. There are 3 subtypes :-

a) Relation model :-

The relational model uses a collection of tables to represent both data & the relationships among those data. Each table has multiple columns and each column has a unique name.

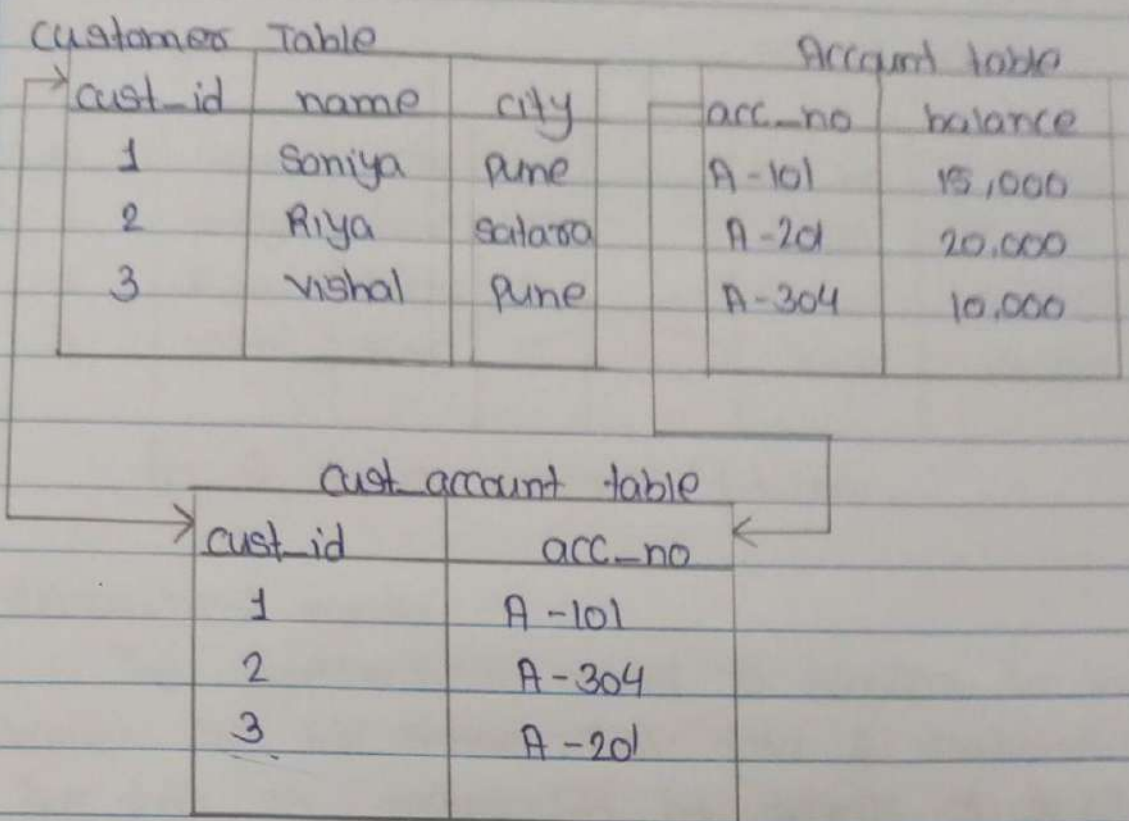

fig. A sample Relational model

eg. In a database, there are 2 tables customer & account. The relationship between these 2 tables has been shown in cust-account table. In cust-account table, where one field or column from both table is taken together.

b) Network model:-

Data in the network model is represented by collections of records & relationships among data is represented by links, which can be viewed as pointers. The records in the database are organized as collection of arbitrary graphs.

Customer table

Account table

cust id	Name	city	link	acc. no	balance
1	Soniya	pune	• →	A-101	15,000
2	Riya	satarra	• →	A-201	20,000
3	vishal	pune	• →	A-301	10,000

fig. A sample network database

c) Hierarchical model :-

The hierarchical model is similar to the network model in the sense that data & relationships among the data is represented by records of links, resp. It differs from the network model in that records are organized as collections of those rather than arbitrary graphs.

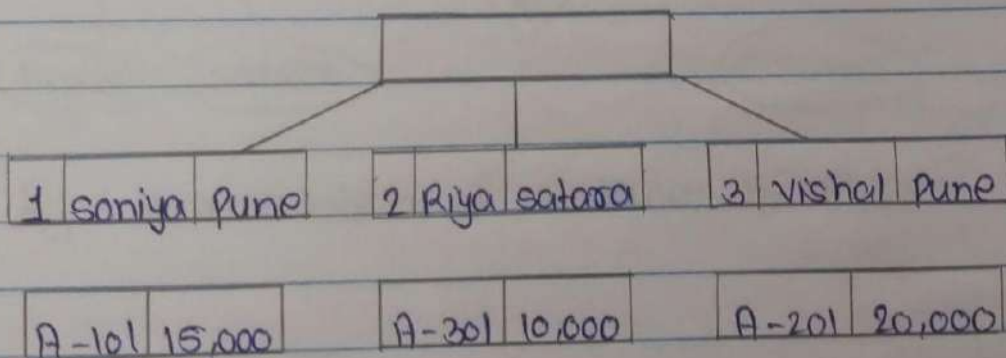

fig: A sample hierarchical database

Q-2] What are the different types of attributes?

⇒ Attributes :-

once, the entity is identified, then it is described in real terms or through its attributes. For each attribute, set of permitted values are available called as domain. [A set of all possible values for that particular field is called domain.]

In E-R diagram, an attribute is represented in two different ways.

- 1) By ellipses attached to entities
- 2) By listing the attribute as text.

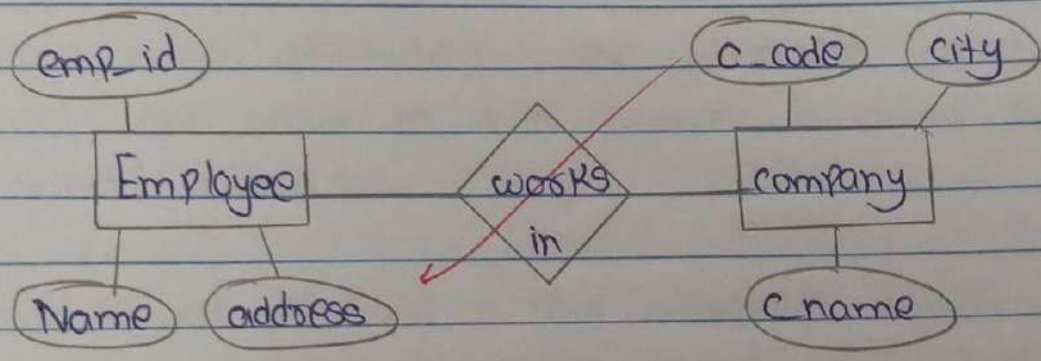

fig:- Representation of attributes by ellipses

fig. Representation of attribute by text

An attribute may be of following types :-

1) Simple attribute :- The attribute which are not divided into subparts is called as simple attribute. These are also called as atomic attributes.

e.g. roll-no

roll-no

2) Composite attribute: The attribute can be divided into subparts.

e.g. name is divided into first name, middle name & last name.

3) Single valued attribute :- The attributes which contains only one value in their column is called single valued attributes.

4) Multi-valued attribute :- The attributes which contains more than one value is called multivalued attribute.

e.g. Contact-no

The multivalued attributes are represented by following symbol.

5) Null attribute :- The attribute without any value is called as null attribute.

e.g. Phone-no of employee can have null value, if employee does not have telephone connection.

↳ Derived attributes :- The value of this attribute can be derived from values of other related attributes or entities. It is represented as dotted ellipse or oval.

e.g. age can be derived attribute.

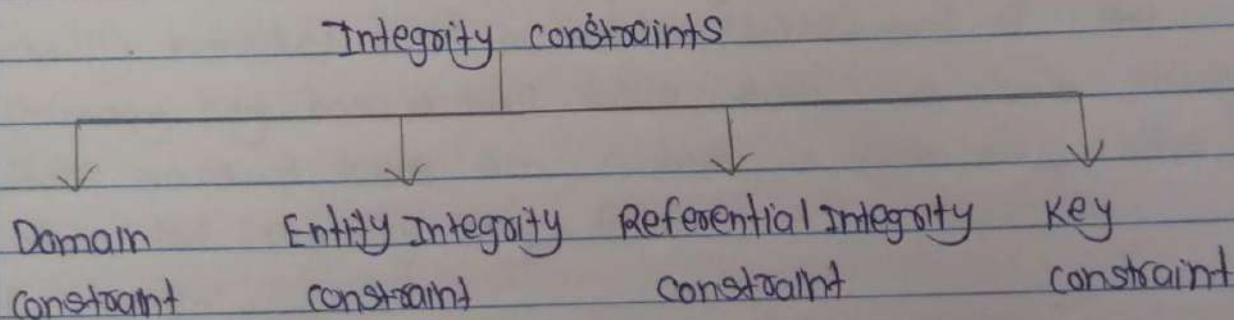

Q-3] What are the different types of constraints?

⇒ Integrity constraints :-

Integrity constraints are a set of rules. It is used to maintain the a quality of information. Integrity constraints ensure that the data insertion, updating & other processes have to be performed in such a way that data integrity is not affected.

Types of Integrity constraints :-

1] Domain constraints :- Domain constraints can be defined as the definition of a valid set of values for an attribute. The data type of domain includes string, character, integers, time, date etc. The value of the attribute must be available in the corresponding domain. e.g. roll-no data type is int. ∴ we can not enter character value for roll-no.

2] Key constraints :- Keys are the set of attributes used to identify record in entity set uniquely. An entity set can have multiple keys, but out of which one key will be the primary key.

There are 4 types of key :-

- a) super key
- b) candidate key
- c) primary key
- d) foreign key

3] Entity Integrity constraints :- The entity integrity constraint states that primary key value can't be null. This is because the primary key value is used to identify individual rows in relation (table) and if the primary key has a null value, then we can't identify those rows. A table can contain a null value other than the primary key field.

e.g. emp-

emp id	Name	designation
123	sam	clerk
	Jay	cashier

Not allowed as primary key can't contain null value

4) Referential Integrity constraints :-

A referential integrity constraint is specified between two tables. In the referential integrity constraints, the domain for foreign key must be same as domain for primary key.

eg. Table 1

Emp id	Name	Dept. no
1	Satyash	11
2	Ramila	24
3	Rohan	18
4	shiv	13

foreign key

Not allowed as dept. no 18 is not in domain of dept. no primary key in table 2.

Relationship

	Dept no	D. location
Primary Key	11	Pune
	24	Pune
	13	Delhi

5) Unique constraint :- Unique constraint ensures that all values in a column are different. Both the unique & primary key constraints provide a guarantee for Uniqueness for a column or set of columns.

A primary key constraint automatically has a unique constraint. However, you can have many unique constraints per table but only one primary key constraint possible.

Null/not null vector constraint :- The not null constraint on an attribute specifies that the null value is not allowed for that attribute; in other words, the constraint excludes the null value from the domain of that attribute. e.g. the not null constraint on the name attribute of the student relation ensures that the name of the student can not be null.

Check constraint :- A check constraint in DBMS allows you to specify a condition on each row in a table.

The check constraint is used to limit the value range that can be placed in a column. If you define a check constraint on a single column it allows only certain values for this column.

4] Define :-

a] super key :-

It is a set of one or more attributes taken collectively to uniquely identify a record in a table.

e.g. cust (cust_id, cust_name, cust_addr)

Possible super keys are as follows :-

{cust_id}, {cust_id, cust_name},

{cust_id, cust_name, cust_addr}

b) Candidate Key :-

Minimal Super key is candidate key or candidate key is super key whose proper subset is not super key again.

e.g. in above example.

{cust_id} is candidate key.

c) Primary Key :-

one of the candidate key. It is a set of one or more attributes taken collectively to uniquely identify a record in a table.

e.g. cust_id is a primary key for cust.

d) Foreign Key :-

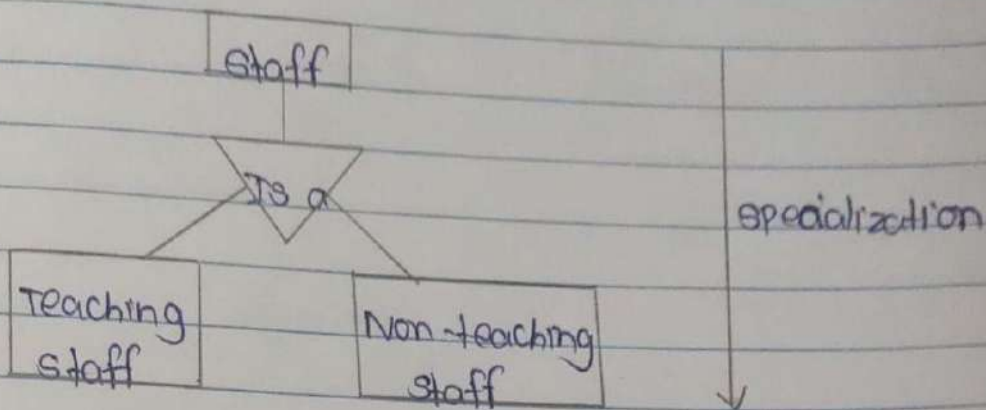

Primary key of another table is called as foreign key

Q-5] Explain extended features of ERD.

⇒ a) specialization :-

In specialization, an entity is divided into sub-entities based on their characteristics, specialization is defined as "the process of identifying subsets of an entity that share some distinguishing characteristic."

It is a top down approach where higher level entity is specialized into two or more lower level entities.

b) Generalization :-

Generalization is defined as "the process of identifying some common characteristics of a collection of entity sets and creating a new entity set that contains entities possessing these common features."

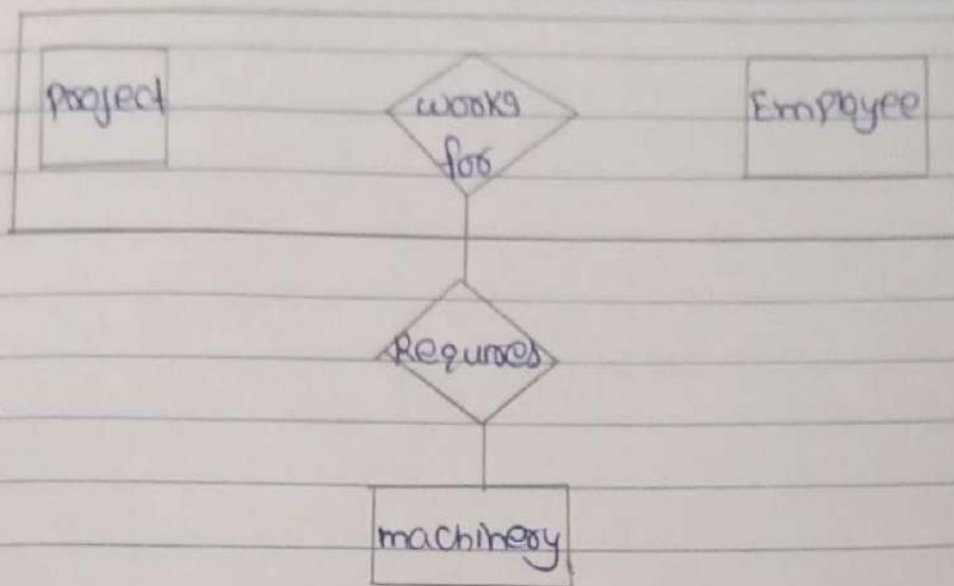

It is a bottom up approach in which two or more entities can be generalized to a higher level entity if they have some attributes in common.

c) Aggregation :-

It is the process of combining info. on a object so that the higher level objects can be abstracted.

In any entity relationship diagram, we can not form a relationship among the entities and their relationship.

d) Structure of Relational Database:-

Following are the components / elements of relational database structure.

i) Relation :- A relation corresponds to a table of data.

ii) Tuple :- A single row of a relation

iii) Attribute :- column of a relation

iv) Cardinality :- The no. of tuples in a relation is called cardinality of a relation.

v) Degree :- The no. of attributes in a relation is called as degree of relation.

e.g. student

Rollno	Name
6001	Ankita
6002	Ashish
6003	Raghav

Cardinality of a student relation is 3. Degree of a student relation is 2.

vi) Primary Key :- a unique identifier for a tuple in relation.

OLAP (On-Line Analytical Processing)

The term On-Line Analytical Processing (OLAP) was coined by E.F. Codd in 1993 to refer to a type of application that allows a user to interactively analyze data. An OLAP system is often contrasted to an OLTP (On-Line Transaction Processing) system that focuses on processing transaction such as orders, invoices or general ledger transactions. Before the term OLAP was coined, these systems were often referred to as Decision Support Systems.

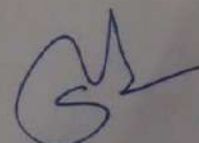

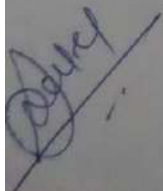

OLAP is now acknowledged as a key technology for successful management in the 90's. It describes a class of applications that require multidimensional analysis of business data.

OLAP systems enable managers and analysts to rapidly and easily examine key performance data and perform powerful comparison and trend analyses, even on very large data volumes. They can be used in a wide variety of business areas, including sales and marketing analysis, financial reporting, quality tracking, profitability analysis, manpower and pricing applications, and many others. OLAP technology is being used in an increasingly wide range of applications. The most common are sales and marketing analysis; financial reporting and consolidation; and budgeting and planning. Increasingly, however OLAP is being used for applications such as product profitability and pricing analysis; activity based costing, manpower planning; quality analysis, in fact for any management system that requires a flexible, top down view of an organization.

Online Analytical Processing (OLAP) is a method of analyzing data in a multidimensional format, often across multiple time periods, with the aim of uncovering the business information concealed within the data'- OLAP enables business users to gain an insight into the business through interactive analysis of different views of the business data that have been built up from the operational systems. This approach facilitates a more intuitive and meaningful analysis of business information and assists in identifying important business trends.

OLAP is often confused with Data Warehousing. OLAP is not a data warehousing, methodology, however it is an integral part of a data warehousing solution. OLAP comes in many different shades, depending on the underlying database structure and the location of the majority of the analytical processing. Thus, the term OLAP has different meanings depending on the specific combination of these variables.

OLAP can be defined as the process of converting raw data into business information through multi-dimensional analysis. This enables analysts to identify business strengths and weaknesses, business trends and the underlying causes of these trends. It provides an insight into the business through the interactive analysis of different views of business information that have been built up from raw operating data which reflect the business users understanding of the business.

Street Play

All students of VCACS are hereby informed that Street Play will be held on 20/1/2020 @ 12:00 to 1:00 . Interested students should register their names to the committee member on or before 19/01/2020 till 3:00 pm.

Venue: Main entrance lobby.

Street Play Competition committee members:

In-Charge : Suvarna Shinde

Members : Deepti Jakhalekar, Nilima Chincholkar, Swapnil Chougule.

Volunteers: Anjali Habib, Mangesh Lade, Aniket Powar, Meghsingh Rathod.

• **Subjects of Street Play:**

- Akrosh (Bezuban ki kahani unhi ki Zubani)
- जागो बंधू जागो!
- Road Safety
- जगाचा पोशिंदा शेतकरी!
- Environment
- सत्यमेव जयते!!

Rules:

- ❖ ID card is compulsory.
- ❖ Registered teams must be present before 15 of competition otherwise that team will be disqualified.
- ❖ Junior and Senior college team should be separate.
- ❖ Time limit is 10 minutes.
- ❖ Minimum 7 and maximum 10 members per team are allowed.
- ❖ Use of mike are not allowed
- ❖ Decision of the Judges will be final.

BRACT's

Vishwakarma College of Arts, Commerce and Science, Pune

Department of NSS

Report on

"International Yoga Day"

Date : 21st June 2019.

Venue – VCACS, Ground ,Pune.

The Department of NSS, Vishwakarma College of Arts, Commerce and Science, Pune conducted a workshop on 21st June 2019, on "International Yoga Day".

Guest invited for the workshop

- Miss. Shivani Chinchole. (NATIONAL YOGA TRAINER)

NSS COMMITTEE:-

- Prof. Hemant Jadhav(Program Officer)
- Prof. Sudhir Chitnis. (HOD- Science)
- Prof. Suvarna Shinde.

Objective of the Workshop:

- To promote the importance of doing Yoga for Self- development.
- To develop the habit of meditation among students so that they can enjoy more peace of mind and self-awareness, which is essential for a stress-free existence.
- To stay mentally and physically fit.

Minutes of the speaker:

Guest speaker and Yoga trainer Miss. Shivani Chinchole was invited to the campus of VCACS to make students available about importance of doing yoga

and meditation in our life. She has not only talked about various Aasanas, Pranayama, Suryanamaskar and meditation but also she taught everyone how to do it. She said that yoga helps to keep the internal organs in the body to function properly by increasing the oxygen and blood flow. Proper oxygen and blood supply to all the vital organs helps to diminish the occurrence of major diseases related to heart, lungs, kidneys and other vital organs.

Students benefited – 30

Yoga Day photos:

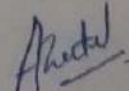

Conclusion:

World Yoga Day aims to educate people about the various means of overcoming stress naturally without resorting to any artificial medicine. In short World Yoga Day aims to bring different communities around the globe together through the practice of yoga, so that they can eliminate all types of negativity from their lives and gain control over their emotions as well as health ailments which often acts as the major hindrance in our path of self- development

All students are hereby inform that Assignment I Submission Schedule is as follows:

Sr.	Subject	Assignment Questions
1	Software Architecture and Design Pattern	1. What is Unified Process? Explain the phases of UP. 2. Define Pattern And Design Pattern. 3. What is Early and Lazy instantiation? Explain with example. 4. What is GRAPS? Define its responsibilities. 5. Difference between Spring Boot and Spring Core.
2	Machine Learning	1. Write a note on decision tree classification algorithm. 2. Write a note on SVM(Support Vector Machine). 3. Explain Apriori algorithm 4. Write down steps of Machine Learning process 5. Difference between Differential statistics and Inferential statistics
3	Web Framework	1. Explain event Handling. 2. Explain Node.JS process model. 3. What is buffer? explain a buffer with example. 4. How to create web server in Node.Js? Explain with example. 5. Explain models.py in detail.

Note :

1. Write this assignments in Journal and upload respective PDF file on google form.
2. It is considered for internal assessment.
3. Students should be responsible for submitting and signing the assignments.
4. Submission date for all subjects- 10th April 2021.

Subject: Software Architecture of Design Pattern

Title: Assignment

Name: Neha Tummalapalli

Roll No.: 7158

Batch: 34 MSc (CS) Sem III

Date: 09/04/21

Date: 15/04/21

(Performed)

(Submission)

Q1. What is unified Process? Explain the phases of Unified Process.

Ans - 1. The unified Process (UP) combines commonly accepted best practices, such as an iterative lifecycle & risk-driven development into a cohesive & well-documented description.

2. UP is based on the enlargement and refinement of a system through multiple iterations, with cyclic feedback and adp adaptation.

3. The system is developed incrementally over time, iteration by iteration, and thus this approach is also known as iterative & incremental software development.

← Phases of unified process -

① Inception - The inception phase is similar to the requirement collection and analysis stage of the software development model. During the inception phase, the basic idea and structure of the project is determined. In this phase, one has to collect requirements from the customer, analyze the project's feasibility.

② Elaboration - In this phase, you'd be expanding upon the activities undertaken in the inception phase. The major goals of the phase include creating fully functional requirements & creating a detailed architecture for fulfillment of the requirement.

③ Construction - In this phase, you will be writing actual code and implementing the application features for each iteration. This period is also where integration with other services or existing software

Q5. Difference between Spring boot & Spring Core

Ans -

Spring Core	Spring Boot
1. The spring core module forms the backbone of the entire spring framework.	1. Spring Boot won't replace the Spring Framework because Spring Boot is Spring Framework.
2. All other spring module are dependent on this module.	2. It simplifies the way we develop because it makes it easy to create production-ready.
3. It is used for building applications	3. It is used to develop REST APIs.
4. The primary feature is dependency injection.	4. The primary feature is Auto configuration.
5. It helps to make things simple by allowing us to develop loosely coupled applications.	5. It helps to create a stand-alone application with less configuration.
6. The developer writes a lot of code (boiler-plate code) to do the minimal task.	6. It reduces boiler-plate code.
7. To test the spring core project, we need to set up the server explicitly.	7. Spring Boot offers embedded server such as Jetty & Tomcat, etc.

Bansilal Ramnath Agarwal Charitable Trust's

(Affiliated to Savitribai Phule Pune University)

NAAC Accredited with 'B+' Grade

Date : 22/01/2021

Notice

This to inform to all students of SYMSc(CS) that they have to submit Seminar Report for all subjects. Topics are given below. Select the one topic for each subject.

Submit all reports on or before Monday, 1/02/2021.

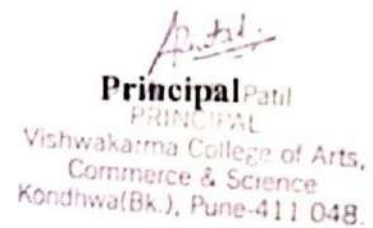

Sr. No	Subject	Topic
1	Software Architecture And Design Pattern	Study of Design Pattern
		Study of Framework
2	Machine Learning	Statistical Methods used in Machine Learning
		Clustering in Machine Learning
3	Web Frameworks	Django Technology
		Express JS

Note :

- Maximum 500 words.
- Submission link will be provided by respective faculties.

Machine Learning

Clustering in Machine Learning

1] What is Machine Learning?

- **Machine learning (ML)** is the study of computer algorithms that improve automatically through experience.[1] It is seen as a part of artificial intelligence. Machine learning algorithms build a model based on sample data, known as "training data", in order to make predictions or decisions without being explicitly programmed to do so.[2] Machine learning algorithms are used in a wide variety of applications, such as email filtering and computer vision, where it is difficult or unfeasible to develop conventional algorithms to perform the needed tasks.
- **Clever** : Machine Learning can review large volumes of data and discover specific trends and patterns that would not be apparent to humans. For instance, for an e-commerce website like Amazon, it serves to understand the browsing behaviors and purchase histories of its users to help cater to the right products, deals, and reminders relevant to them. It uses the results to reveal relevant advertisements to them.
- **Autonomous** : With ML, you don't need to babysit your project every step of the way. Since it means giving machines the ability to learn, it lets them make predictions and also improve the algorithms on their own. A common example of this is anti-virus softwares; they learn to filter new threats as they are recognized. ML is also good at recognizing spam.
- **Upgradable** : As ML algorithms gain experience, they keep improving in accuracy and efficiency. This lets them make better decisions. Say you need to make a weather forecast model. As the amount of data you have keeps growing, your algorithms learn to make more accurate predictions faster.
- **Versatility** : Machine Learning algorithms are good at handling data that are multi-dimensional and multi-variety, and they can do this in dynamic or uncertain environments.
- **Wide Applications** : You could be an e-tailer or a healthcare provider and make ML work for you. Where it does apply, it holds the capability to help deliver a much more personal experience to customers while also targeting the right customers.
- **Scalable** : ML algorithms are easily scalable and mostly resources are autoscaled by the algorithms as they gain experience.

2] What is Clustering?

- Clustering is the most popular technique in unsupervised learning where data is grouped based on the similarity of the data-points. Clustering has many real-life applications where it can be used in a variety of situations. The basic principle behind cluster is the assignment of a given set of observations into subgroups or clusters such that observations present in the same cluster possess a degree of similarity. It is the implementation of the human cognitive ability to discern objects based on their nature.

NOTICE

SYBSc (C.S.) INTERNAL ASSIGNMENT -I

Date :22th September 2021

Sem - III

All students are hereby inform that the **INTERNAL ASSIGNMENT -I for CBCS** evaluation is as follows:

Sr. No.	Subject	Assignment Questions
1	CS-231 Data structure and Algorithm-I	1) What do you mean by Data Structure? Give characteristics of Data Structure. 2) Definition of Abstract Data Type(ADT). Explain it 3) Explain different types of data structure 4) Explain different types of asymptotic notations 5) Define Time Complexity and Space Complexity
2	CS-232 Software Engineering	1. What is system? What are its types? 2. What is software? What are its characteristics? 3. What are elements of system? 4. Differentiate between hardware & software. 5. What is software development process? Explain in brief.
3	ELC-231 Microcontroller Architecture and Programming	1. Differentiate between Microprocessor and Microcontroller. 2. Draw block diagram of Microcontroller 8051. 3. Draw bit format of PSW register of 8051. 4. Explain function of following registers – A , B, PC, SP & DPTR 5. Explain internal RAM organization of 8051 in detail.
4	ELC-232 Digital Communication and Networking	1. Explain block diagram of electronic communication system. 2. Differentiate between Synchronous and Asynchronous Serial Communication 3. Write note on Nyquist theorem. 4. Differentiate between Bit rate and Baud rate. 5. Explain significance of Shanon's theorem.

5	MT-231 Group and Coding theory	<p>1. Find value of S & T such that $1 = 7S + 11T$. Show that S & T are not unique integer. 2. Find GCD & express the GCD of the following integer a & b as $ax + by$ where x & y are integer p) 616, 427 q) 1357, 1166 3) Test whether the following relation are equivalence relation or not. Justify a, b are integer, aRb iff a-b is divisible by 5. 4) Find congruence classes a) $n=2$ b) $n=7$ 5) If $(a,b)=1$ & $b ac$ then show that $b c$.</p>
6	MT-232 Numerical Analysis	<p>1. Find the absolute, percentage and relative errors if X is rounded-off to three decimal digits. Given $X=0.005998$ 2. If $X=0.1416$ and is correct to four decimal places then find the absolute accuracy and percentage accuracy. 3. Find a real root of the equation $f(x)=x^3-2x-5=0$ by the method of false position up to three places of decimal. 4. Derive the Newton-Raphson method for finding the value of $1/N$ Where $N > 0$. Find the Value of $1/19$ by using initial approximation as 0.05 5. Find the value of $\sqrt{12}$ using Newton-Raphson method correct to four decimal places.</p>
7	Language Communication (English)	<p>1. How does Sambu and his mother's reactions to the trailers and advertisements differ and why? 2. Why does Sambu's mother not want to see the film? 3. How would you describe Sambu's attitude towards the film? 4. Why do you think Sambu keeps pestering his mother to see the film? 5. How would you describe Sambu's reactions at the end of the story?</p>
8	Environmental Science	<p>1. Write Down Definition of environmental studies. 2. Explain Multidisciplinary nature of environmental studies. 3. Explain scope and importance of environmental studies. 4. Explain the concept of sustainability. 5. Explain the concept of sustainability development.</p>
Note :		

1.All the students should write the above Internal Assignment Test on pages and submit the hardcopy in college.		
2. Mention Sr No and Name on Hardcopy.		
2. It is considered for INTERNAL ASSIGNMENT -I for CBCS evaluation		
3. Students should be responsible for non evaluation.		
4.Submission date for all subjects- 27th September to 30th September 2021 in between 10.00am to 4.00pm.

Date : 22th September 2021
 All students are hereby

Sem - V

Sr. No.	Subject	Assignment Questions
1	CS-351 Operating Systems – I	1. Define Operating System. Explain any two Computer system Components. 2. Write any two Functions of Operating system. 3. Write Advantages & Disadvantages of Multiprogramming OS . 4. Types of Multiprocessor system. 5. Write Advantages of Multiprocessor System.
2	CS-352 Computer Networks – II	1. Define Name Space and explain Flat Name Space and Hierarchical Name Space Explain FQDN and PQDN 2. What is resolution explain in detail. 3. Explain E-Mail Architecture. 4. Explain E-Mail Architecture. 5. What is FTP? How does communication takes place over control connection and over data connection.
3	CS-353 Web Technologies – I	1. Write features of HTML? 2. Define the following terms a) Web Page b) Web Browser c) Web Server d) WWW. 3. Explain about HTML Page Structure? 4. Write a program using any three text formatting tags? 5. Explain about Table tag and Frame tag?
4	CS-354 Foundations of Data Science	1. What are application of data Science? 2. With the help of diagram describe lifecycle of data science. 3. What is data science? Why the learning of data science is important? Explain in detail. 4. Explain 3V's of data Science with diagram. 5. What are components of data scientist toolbox? explain two of them.
5	CS-355 Object Oriented Programming using Java - I	1. Explain the Features of Java. 2. Describe the structure of Java program. 3. Write short note on 1. jdk 2. JVM 4. What are the conventions followed in Java for naming identifiers? Give examples.
6	CS-356 Theoretical Computer Science	1. Define a) Symbol b) Alphabet c) String d) Suffix e) Prefix 2. Construct a DFA for language containing strings starting with 'ab' and ending with 'ca' over {a, b, c}. 3. Construct a DFA for language containing strings starting with 'xy' and ending with 'yz' over {x, y, z}. 4. Construct a DFA for language containing strings having substring '011' over {0, 1}. 5. Construct a DFA for language containing strings starting with 'qr' and having substring 'pr' over {p, q, r}.
7	CS-3510 Python Programming	1. Write any three features of Python programming language? 2. Write any two application of Python programming language? 3. Draw and explain program structure of Python programming? 4. Write a program on addition and subtraction using Input and Output function? 5. Write a program to find area of rectangle and a circle?
8	CS-3511 Blockchain Technology	1. Explain Components of blockchain 2. Explain Consensus Mechanisms 3. Explain Smart Contracts 4. Explain Byzantine Fault Tolerance. 5. Explain Ethereum Virtual Machine, Ether, Gas

Note : All the students should write the above **Internal Assignment Test** on pages and submit the hardcopy in college.

Mention **Sr No and Name on Hardcopy.**

It is considered for **INTERNAL ASSIGNMENT - I for CBCS evaluation**
 Students should be responsible for non evaluation.

Submission date for all subjects- **27th September to 30th September 2021** in between **10.00am to 4.00pm.**

FYBSc (C.S.) ASSIGNMENT SUBMISSION NOTICE

Date :8th May 2021

All students are hereby inform that Assignment Submission Schedule is as follows:

Sem - II

Sr. No.	Subject	Assignment Questions
1	CS-121 Advanced 'C' Programming	1.What are types of pointers in 'C'? 2. Difference between malloc() and calloc(). 3. Explain any four string handling function. 4. Write a function to calculate the length of a string. 5. Define a Structure. Write the syntax for structure declaration.
2	CS-122 Relational Database Management Systems	Q.1 Write a stored function to count no. of records from emp table. Q.2 Explain cursor. Q.3 Explain trigger. Q.4 Explain ACID properties. Q.5 Explain transaction states.
3	MTC-121 Linear Algebra	1) Show that $\cos x, \sin 2x, \cos 2x$ are linearly independent for all $x \in \mathbb{R}$. 2) Let $u_1=(1,0,0), u_2=(1,1,0), u_3=(1,1,1)$. Determine whether $\{u_1, u_2, u_3\}$ is a basis of \mathbb{R}^3 . 3) Find the coordinate vector $x=(2,5)$ with respect to basis $b=\{(4,5), (6,7)\}$ 4) Let $A = \begin{bmatrix} 2 & 1 & 1 \\ 2 & 3 & 3 \\ 3 & 3 & 4 \end{bmatrix}$ with eigenvalue 1. Find the basis for the corresponding eigenspace. 5) Find eigenvalues of $A = \begin{bmatrix} 1 & 1 \\ 1 & 1 \end{bmatrix}$
4	MTC-122 Graph Theory	1) Determine whether the following Statement are true or false and justify your ans. i) There exists a 5-regular graph on 9 vertices. ii) Degree sequence 5,3,2,2,1,1 is graphical. iii) Every complete bipartite graph is a complete graph. 2) State Hand Shaking Lemma & justify with proper example. 3) Prove that in any graph no. of vertices of odd degree is always even. 4) Draw following graphs: 1) K_5 2) $K_{3,4}$ 3) $3R_6$ 4) C_7
5	ELC-121 I Instrumentation System	1.Explain Instrumentation System with the help of block diagram. 2. What is transducer and sensor? Explain working principle, give suitable examples. 3. Explain in brief temperature sensor LM35 with its specifications, applications. 4. Explain in brief LDR as an optical sensor. State some applications of optical sensor. 5. Explain with principle of working PIR Sensor. State its applications.
6	ELC-122 II Basics of Computer Organisation	1. What is a Flip-Flop. List different types of FF? 2. Draw logic diagram of RS-FF using NAND gates & explain its working with truth table. 3. Draw logic diagram of 4-bit SIPO shift register & explain working in detail. 4. Draw circuit diagram for 3-bit asynchronous UP counter & explain working with timing diagram. 5. Differentiate between Synchronous & Asynchronous counters
7	CSST121 Methods of Applied Statistics	1) What are the limits of Karl Pearson's coefficient of correlation. Give interpretation in detailed. 2) For bivariate data $n=5, \Sigma X=20, \Sigma X^2=20, \Sigma Y=20, \Sigma Y^2=90, \Sigma XY=75$, Compute correlation coefficient and interpret the result. 3) Define coefficient of determination. 4) Write two regression equations. Write any four properties of regression coefficients. 5) Two lines of regression are $X-4Y=5$ and $X-16Y=-64$. Find the means of X and Y.
8	CSST122 Continuous Probability Distributions and Testing of Hypothesis	1) Define Continuous Uniform Distribution. State its mean and variance. 2) If X follows U (0, 10) Find mean and variance of X. 3) Define Exponential Distribution. State its mean and variance. 4) State lack of memory property of Exponential Distribution with mean θ . 5) The lifetime of a microprocessor is exponentially distributed with mean 3000 hours. Find the probability that i) The microprocessor will fall within 300 hours. ii) The microprocessor will function more than 6000 hours.

Note :

- All students should make 200 pages book for assignments and keep with them for whole year.
- It is considered for internal assessment.
- Students should be responsible for submitting and signing the assignments.
- Submission date for all subjects- 17th May 2021

Subject: DATABASE MANAGEMENT System

Title: Assignment - 2

Name: Bhure Sumit Bhagwat

Roll No.: _____ Batch: II

Date: 16/1/2018 (Performance) Date: 16/1/2018 (Submission)

Teacher's Signature

Q. Consider the Following Entities and Relationships.

Wholesaler (w-no, w-name, addr, city)
 Product (p-no, p-name)
 Wholesaler and product are related with
 Many-to-Many relationships.

Create a RDB for above and solve the following queries in SQL.

Ans:- Many-to-Many relationship allow us to create new table. The RDB is as shown below -

wholesaler whole-prod Product.

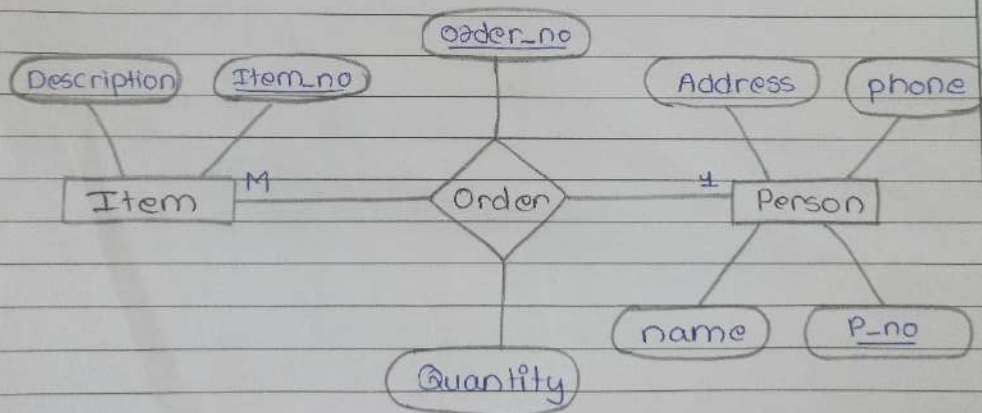

Query 1: List all the wholesaler of product 'books'.

```
select w.name, city
from wholesaler w, product p,
whole-prod r;
```

Query 3:- Insert a record in wholesaler relation
→ INSERT INTO wholesaler
VALUES (111, "Alex", "123, abc Road", "London");

Query 4:- To print wholesaler wise product.
→ SELECT DISTINCT w.name, city, p.name
FROM wholesaler w, Product p, whole_prod r
WHERE w.w_no = r.w_no and p.p_no = r.p_no;

* Draw E-R diagram for order processing system where a person can give order for many items by specifying its quantity.

02-March-20

Dear Aafreen Jamadar,

Further to our discussions, we are delighted to offer you an appointment with Ubisoft Entertainment India Private Ltd., Pune ("Ubisoft" or the "company") for the post "Junior Game Tester (L0)", as per the terms of reference given below.

Terms and Conditions

- You will be governed by the rules, regulations and other Company policies including without limitation the Employee Handbook ("Company Policy") of Ubisoft as applicable, amended or altered from time to time during the course of your employment.
- As a member of an organization that practices flexibility and continuous improvement in work processes and practices, your roles and responsibilities may vary. You are required to report to our office in Pune. You will be reporting to such person in Ubisoft as may be indicated to you from time to time. However, your services are transferable and can be seconded or deputed by the Company to any of the Ubisoft operations or operations of Ubisoft's associate Companies in India or abroad. Ubisoft further reserves the right to transfer your employment to any other company or legal entity, as part of any transfer of undertaking of Ubisoft or as part of any restructuring or amalgamation or such other plan implemented by Ubisoft or by which Ubisoft is bound, on such terms and conditions as applicable to such plan.
- Subject to your accepting this appointment letter and reporting to duty on **02-March-20**, your appointment is effective from the date of joining. You shall be on a contract period for **1 year from the date of joining**. You shall be on a probationary period of **six months**, at the end of the probationary period, your performance will be reviewed and if found satisfactory, the contract period can be further extended, reduced or waived at the discretion of the management. During the probationary period, either party may terminate this appointment by giving **15 days'** notice or payment of salary in lieu thereof.

After successful completion of six months contract, either party may terminate this appointment by **1 month** in writing or payment of salary in lieu thereof.

At the end of the contract term, the duration may be extended, on such terms and conditions as may be mutually agreed by the parties.

Ubisoft may immediately terminate your services without any compensation or notice thereof, if you are in material breach of your responsibilities which breach either (i) is incapable of remedy; or (ii) if capable of remedy, has not been remedied by you for at least seven days after receipt of notice from Ubisoft. In the event of your continuous absence for a period of ten consecutive working days or more or overstaying the sanctioned leave without sufficient grounds, proper or satisfactory explanation and without formal request or permission from the Ubisoft management for the same, you shall be deemed to have abandoned and

"DDSIO Winter Internship 2020"

We are glad to inform that Mr **Akshay Shelke**, from **Vishwakarma college of arts commerce and science** has successfully completed **DDSIO Winter Internship** from **8th December 2020** to **6th June 2021**.

During the internship Akshay primarily fulfilled responsibilities of developing website frontends. Along with this, he also completed the course on full stack development with some tasks and one industry level project.

We found Akshay extremely inquisitive and hard-working in the course of 6 months. He demonstrated enthusiasm and eagerness in all the activities. Akshay showed sincerity towards the assigned tasks and put in the required efforts to gain an in-depth understanding of the web development.

Akshay association with us has been very fruitful and we wish him all the best for future endeavours.

You are required to provide statement of income till date for this financial year, as well as proof of tax saving for the current financial year. Please note that the company will not be liable for any misrepresentation in your declaration of your income prior to joining the company. Your Salary Will Credit in your account on 1st of Every Month.

2. Probationary period

First 7 Seven days will be observation period of your job. If these 7 days will satisfactory than you will continue with us else not. For these 7 observation period company will not pay you any amount. After observation period you will be on probation for 6 months from the date of joining, on the completion of which your services will deemed to be confirmed. If your probation period is extended under any circumstances, the same will be communicated to you in writing.

3. Leaves

You will be entitled to Festivals & National Holidays and leaves as per the leave policy of the company. For the purposes of the leave the year shall run from January to December. All leaves should be applied for in advance and should be approved by the manager. The company reserves the right to grant the leave applied, depending on the contingency of work. As per Company Policy you will get 7 Paid Leave/Month, above this leave treated as LEAVE WITHOUT PAY.

4. Transfer

During the course of employment in Company, as per exigencies of work you shall be liable to be transferred at the discretion of the management from one work, department, section or job to another. In which case your designation could also be suitably changed. Your services can also be transferred to any other offices in India in the larger interest of the company, at the sole discretion of the management. In such situations your terms of appointment shall remain unchanged.

5. Medical examination

The company shall have the right to require you to be examined by a doctor of the company's choice, at the company expense, and you are required to cooperate fully.

6. Ownership of work

The ownership of any rights to any works by the employee during the terms of employment shall lie with the Company.

7. Notice Period

If you wish to resign you are required to serve at least 60 days notice or payment in lieu of. Please note if you leave the services of the organization without submitting the resignation & notice period, you shall be treated absconding and loose the lie on the job; in such a case the employer shall not be liable to issue you the experience Certificate and any other due.

8. Termination

During probation period, your services can be terminated, without notice and assigning any reason, if your services are not found satisfactory, at the discretion of the management. After confirmation of your employment, notice of termination of employment will be one(1) month notice in writing or one (1) month's salary in lieu of notice from either party. Notwithstanding the aforementioned, the Company shall be entitled to terminate your employment without notice and compensation in any of the following events:

- if you are in the opinion of the Company, guilty of dishonesty, misconduct or negligence in the performance of your duties
- if you have been found to have committed a serious breach or continua: material breach of any of your duties or obligations;
- if you are found to have made illegal monetary profit or received any gratuities or other rewards, in cash or in kind, out of any of the Company's affairs or any of its subsidiaries or related companies. You would also be liable to be removed from the services at any time without any notice and compensation, in case, if any information furnished by you in connection with the above appointment is found incorrect at any stage or correct information is found suppressed.

9. Rules, Regulation and Confidentiality

You will not, without the previous written consent of the Company become interested or engaged directly or indirectly, in any trade, business and occupation. You will not (except in the normal course of the Company's business) publish any article or statement, deliver any lecture or broadcast or make any communication to the press (including magazine publication) relating to the Company service's or to any matter with which the company may be concerned, unless you have obtained permission from the company.

You will not own, manage, operate, control, participate in, or be connected in any manner with the ownership, control, management or operation as an individual or as partner, joint venture, director, shareholder of a company or entity, of any business which directly competes with the present business of the company or such other business activity in which the company may substantially engage during the term of the services. You must not directly or indirectly either during employment or for a period of 12 months after separation thereof, solicit, or try to entice away from the company any person or business at any time in 12 months before separation that you may have dealt with or was a potential client of the company.

During the course of your employment here with us, you will frequently have access to certain vital business information, trade secrets proprietary information, customer related information that are confidential in nature. It is expressly understood and clear that you shall not divulge or part with any such information to anyone other than those dealing with such matters in the company nor will you reveal it to anyone even after your leaving the services of the company.

Office timing is 9:30 AM To 6 PM , If you fail to join office till 9:00AM than you will mark HALF DAY for same day.

10. Code of Conduct:

During the course of your employment with the Company, you shall be required, to abide by the TRA's guidelines on NDNC. It shall be noted that during the term of your employment with the Company, under any circumstances you will send sms or make calls only to non-NDNC numbers. Violation of guidelines will be treated as a breach of code of conduct and without prejudice strict action will be taken by the company.

11. Dispute Resolution

In case of any dispute or difference in respect of interpretation of the terms & conditions of this agreement, both the parties shall resolve the same amicably through discussions by the duly appointed representatives. However, any dispute having not resolved shall be referred to the sole arbitration by a person duly nominated by the company as an arbitrator, whose decision shall be final and binding on both the parties. The arbitration shall be at Delhi and proceedings shall be in English.

12. Amendments

The company reserves all rights to change any rules, regulations as it deems fit from time to time and you will be governed by the rules which are in force and as may be added, amended or introduced.

We take pleasure in welcoming you to our company and hope will find individual and professional satisfaction in your association with us.

If you find that the terms are favorable, please indicate your acceptance within seven (7) days from the date of this letter.

This offer will automatically lapse and can no longer be accepted if we do not hear from you by the stipulated date.

I have read and understood and hereby accept the terms and conditions of my appointment with the company

Acceptance Signed: _____ Name: _____

DEPARTMENT OF COMPUTER SCIENCE

Mr. Bharat Chowdhary, Master of Computer Science (MCS) completed his Internship as “Trainee Software Engineer for partial fulfillment of requirement towards Final Year of their MCS project from “Digital Earth Technologies LLP”, Pune.

Dec 15, 2020

Mr. Bharat Chowdhary,
Kondhwa Khurd, Pune,
Maharashtra - 411048.

Subject : Internship Offer

Dear Bharat Chowdhary,

On behalf of Digital Earth Technologies LLP, I am excited to extend an offer to you for an internship position within our software department. This position is located in Pune, Maharashtra. The position is for the role of a Web Developer Intern.

This position is scheduled to begin Jan 01, 2021 and will be a six-month internship opportunity ending on Jun 30, 2021. The schedule for this position is Monday-Saturday from 10 a.m. to 7 p.m. This position will be unpaid. As a temporary employee in the role of an intern, you will not be eligible for any company-sponsored benefits. In this role, you will report directly to Mr. Vihar Mehta. This offer is contingent upon the successful completion of a MCS/MCA/ME. Please be sure to bring a photo ID, address proof and your bank account information with you on your first day to complete your profile.

During your temporary employment with Digital Earth Technologies LLP, you may have access to trade secrets and confidential or proprietary business information belonging to the company. By accepting this offer, you acknowledge that this information must remain confidential and agree to refrain from using it for your own purposes or disclosing it to anyone outside of Digital Earth Technologies LLP. Also, you agree that upon completion of your internship, you will promptly return any company-issued property and equipment along with information and documents belonging to the company. By accepting this offer, you acknowledge that your unauthorized participation in this program is not an offer of employment, and successful completion of the program does not entitle you to an employment offer from Digital Earth Technologies LLP. This resignation will neither be accepted nor entertained in the event of any on-site/offshore Projects/Assignments.

This offer letter represents the full extent of the internship offer and supersedes any prior conversations about the position. Changes to this agreement may only be made in writing. If you have any questions about this offer please contact Mr. Vihar Mehta in our recruiting department at +91 98343 02625. Please review this letter in full, and sign and return it via email to hr@digitalearthllp.com to confirm your acceptance of the position no later than close of business on Dec 20, 2020. We look forward to having you begin your accounting career at Digital Earth Technologies LLP and wish you a successful internship. Welcome to our team!

Sincerely,

Mr. Vihar Mehta
Recruiter

I, Bharat Chowdhary, accepted the above offer and will begin the internship position on Jan 01, 2021.

Dear Siddhesh Thakur,
Further to our discussions, we are delighted to offer you an appointment with Ubisoft Entertainment India Private Ltd., Pune ("Ubisoft" or the "company") for the post "Junior Game Tester (JGT)", as per the terms of reference given below.

Terms and Conditions

1. You will be governed by the rules, regulations and other Company policies including without limitation the Employee Handbook ("Company Policy") of Ubisoft as applicable, enforced, amended or altered from time to time during the course of your employment.
2. As a member of an organization that practices flexibility and continuous improvement in work processes and practices, your roles and responsibilities may vary. You are required to report to our office in Pune. You will be reporting to such person in Ubisoft as may be indicated to you from time to time. However, your services are transferable and can be seconded or deputed by the Company to any of the Ubisoft operations or operations of Ubisoft's associate Companies in India or abroad. Ubisoft further reserves the right to transfer your employment to any other company or legal entity, as part of any transfer or undertaking of Ubisoft or as part of any restructuring or amalgamation or such other plan implemented by Ubisoft or by which Ubisoft is bound, on such terms and conditions as applicable to such plan.
3. Subject to your accepting this appointment letter and reporting to duty on, **02-March-20** your appointment is effective from the date of joining. **You shall be on a contract period for 1 year from the date of joining.** You shall be on a probationary period of **six months**, at the end of the probationary period, your performance will be reviewed and if found satisfactory, the contract period can be further extended, reduced or waived at the discretion of the management. During the probationary period, either party may terminate this appointment by giving **15 days'** notice or payment of salary in lieu thereof.

After successful completion of six months contract, either party may terminate this appointment by **1 month** in writing or payment of salary in lieu thereof.

At the end of the contract term, the duration may be extended, on such terms and conditions as may be mutually agreed by the parties.

Ubisoft may immediately terminate your services without any compensation or notice thereof, if you are in material breach of your responsibilities which breach either (i) is incapable of remedy; or (ii) if capable of remedy, has not been remedied by you for at least seven days after receipt of notice from Ubisoft. In the event of your continuous absence for a period of ten consecutive working days or more or overstaying the sanctioned leave without sufficient grounds, proper or satisfactory explanation and without formal request or permission from the Ubisoft management for the same, you shall be deemed to have abandoned and

You will join at the latest by 25-Aug-20 in the event you fail to join on or before the joining date, your employment with us the company shall be deemed to have commenced and the offer shall stand voluntarily terminated without notice and but without any liability to the Company such withdrawal shall not prejudice any rights which the Company may have under the applicable law or rules.

2. Place of employment

Your place of employment will be Internal Business Co-Ord. Office on 305, and second floor.

During the course of your employment with the Company, you may be appointed, transferred, deputed or deployed to any other office, projects, divisions, departments or units of the Company or its affiliate or subsidiaries or group companies existing or to be set up at any other location or any other unaffiliated company as may be required to render services to any client of the company or to be abroad ("External Location").

You may be required to travel to any of the other offices of the Company or its customer locations for business reasons, should the need arise.

Although the Company will endeavor to ensure that any transfer or redeployment does not cause unnecessary disruption to your status, the Company does not guarantee the continuation of any facility or benefits upon transfer. In all such cases of transfer or redeployment, the Company's transfer and redeployment policies shall apply. Your salary will be country based. If you relocate to another country, your salary will be adjusted as applicable with the then prevailing market rates as may be advised by the Company for your role in such new country of employment. In case of your deployment, redeployment to any External Location or client site, you may be required to enter into certain other agreements and arrangements with such company or client including non-disclosure agreements, code of conduct or confidentiality agreements as per such company's or client's practice in place from time to time. You shall, at all times while working at the External Location or client's site, adhere to the terms of such agreements and arrangements. You agree that you shall handle issues of such agreements to the Company and seek its prior approval before execution of such agreements.

At the time of your deployment or redeployment to the External Location or client's site, you shall abide by the policies, processes, rules and regulations in place at the External Location or client's site including the housing or locality rules in which the External Location or client's site is situated or the rules prescribed by the landlord of the employer at the External Location or the client's site, you shall observe the policies and processes of the Company.

You shall not take up employment with the client you have been deployed with for at least 6 (six) months from your last working day with the Company, without prior written approval from the Company.

At no point shall you divulge or give out any Confidential Information (as defined hereinafter) which may be in your possession by virtue of your deployment, redeployment with the client to any unauthorized person. You shall adhere to confidentiality obligations and best practices and keep all Confidential Information in your possession during redeployment or deployment with the client.

3. Compensation

For every we are providing training and work on live project. During training period and live project we are not providing any fixed salary.

You will not be entitled to any additional remuneration on account of any special assignment, deployment or redeployment. Undertake as you during your normal course of employment with the Company.

Internship Offer

Dear Onkar,

Congratulations!!

On behalf of Novosalus Technologies, I am pleased to extend you this offer of temporary employment as an Intern, Frontend Development. You will begin your internship with the Company from 15th Feb 2021 for duration of 6 months and will be paid a stipend of 3000/ month.

Your internship with the Company is "at-will," which means that either you or the Company may terminate your internship at any time, with or without cause and with or without notice. During your employment, you may have access to trade secrets and confidential business information belonging to the Company. By accepting this offer of employment, you acknowledge that you must keep all of this information strictly confidential, and refrain from using it for your own purposes or from disclosing it to anyone outside the Company. In addition, you agree that, upon conclusion of your employment, you will immediately return to the Company all of its property, equipment, and documents, including electronically stored information.

By accepting this offer, you agree that throughout your internship, you will observe all policies and practices governing the conduct of our business and employees, including our policies prohibiting discrimination and harassment. This letter sets forth the complete offer we are extending to you, and supersedes and replaces any prior inconsistent statements or discussions. It may be changed only by a subsequent written agreement.

I hope that your association with the Company will be successful and rewarding.

Dear Sharon,

Welcome to Infosys!

Today, the corporate landscape is dynamic and the world ahead is full of possibilities! None of the amazing things we do at Infosys would be possible without an equally amazing culture, the environment where ideas can flourish and where you are empowered to move forward as far as your ideas will take you.

At Infosys, we assure that your career will never stand still, we will inspire you to build what's next and we will navigate further, together. Our journey of learnability, values and trusted relationships with our clients continue to be the cornerstones of our organization and these values are upheld only because of our people.

We look forward to working with you and wish you success at your career with us.

Report on National Science Day – Rangoli Competition

Date: 28th February 2022

Platform: Google Form

Brief details of the event -

BRACT's, Vishwakarma College of Arts, Commerce and Science, Pune, conducted a Rangoli Making Competition on 28th February 2022 on the Occasion of National Science Day.

Objective of the event –

- To promote a scientific drive in the students.
- To spread a message about the importance of science used in the daily life of the people.
- To give an opportunity to the scientific minded students.

Summary –

National Science Day is celebrated every year on February 28. This day recalls the notable invention "Raman Effect" by India's greatest scientist C V Raman. He was awarded the Nobel Prize for this discovery. Since that day, February 28 is being commemorated as National Science Day to recall the great discovery of CV Raman.

Rangoli Making competition was organized in order to enhance creativity and unleash the hidden potential in the students. Students made beautiful Rangoli designs by using various color combinations. Their artisanship was quite fascinating and they thoroughly enjoyed this activity that tickled their creative side.

This year's Rangoli Competition theme was 'National Science Day'. We have received a good response to this competition. Under this competition, Students has to draw and submit their Rangoli image on the given Google form link. A total of 22

students registered and submitted their Rangoli designs. The best entries were awarded with E-certificates.

Report on National Energy Conservation Day

Date: 14th December 2021

Brief details of the event -

On the occasion of "National Energy Conservation Day" our college "Vishwakarma college of Arts, Commerce and Science, Kondhwa," organized "Poster Making Competition"

Objective of the event –

- To drive mass awareness about the importance of energy efficiency and energy conservation among the students.
- Encourage students to reduce energy consumption and use it's efficiently.

Summary -

National Energy Conservation Day is celebrated on 14 December annually. The Bureau of Energy Efficiency (BEE) of India implemented the Energy Conservation Act in 2001. The Ministry of Power is celebrating Energy Conservation Week from 8 to 14 December 2021 under Azadi Ka Amrit Mahotsav. Several activities have been undertaken by Power CPSUs as part of the celebrations.

It is observed every year to spread awareness about the importance of energy and the need of conserving energy by using less energy. Know about the theme, history, and significance of the day. This year's Poster presentation theme for the National Energy Conservation Day is 'Save Energy-Save Earth'. We have received good response to this competition. Under this competition, Students has to prepare and submit their posters on the given Google form link. A total of 25 students registered and submitted their Posters. The best entries were awarded with E-certificates.

Drawing competition

नवउद्योजक स्पर्धा

दिनांक - ०६ फेब्रुवारी २०२०.

स्थळ: - वर्गखोली क्र-०५.

विश्वकर्मा कला, वाणिज्य व विज्ञान महाविद्यालयात मी उद्योजक / नवउद्योजक स्पर्धा घेण्यात आली.

सदस्य: प्रा. जय निकंबे.

उद्दिष्ट्ये: - विद्यार्थ्यांमध्ये प्रयोगशीलता निर्माण करणे.

- उद्यमशीलता व नवनिर्मितीस चालना.

- व्यावसायिक जीवनात मार्गक्रमण करण्यासाठी प्रेरणा .

- व्यक्तिमत्व विकास.

आपल्या परिसरात उपलब्ध होणारा कच्चा माल, निरुपयोगी अथवा टाकाऊ वस्तू यांच्यापासून विद्यार्थ्यांनी नवनिर्मितीचा उत्तम प्रयत्न केला. विविध प्रकारच्या पर्यावरणपूरक वस्तू विद्यार्थ्यांनी तयार केल्या तसेच विद्यार्थ्यांनी आपण तयार केलेल्या वस्तूविषयी माहिती दिली.

विद्यार्थ्यांनी तयार केलेल्या वस्तूंचे छोटेखानी प्रदर्शन भरविण्यात आले. प्रा.डॉ. शीतल मंत्री यांनी व महाविद्यालयातील सर्व प्राध्यापकांनी या प्रदर्शनास भेट देवून विद्यार्थ्यांचे कौतुक केले. विद्यार्थ्यांनी तयार केलेल्या वस्तूंची विक्रीही करण्यात आली.

सदर स्पर्धेचे अनुक्रमे विजेते -

- १) रसिका शहाणे - या विद्यार्थिनीने टाकाऊ प्लास्टिक पिशव्यांचा वापर करून शोभेच्या वस्तू व उपयुक्त वस्तू तयार केल्या.
- २) पल्लवी कांबळे - विविध प्रकारच्या टाकाऊ वस्तूपासून अनेक शोभेच्या वस्तू तयार केल्या. भोपळा, टाकाऊ कागद, वर्तमानपत्र इ वस्तूंचा वापर करून शोभेच्या वस्तू तयार केल्या.
- ३) मनीषा पवार - जुन्या कापडाचा वापर करून पायपुसणी व विविध प्रकारच्या टोप्या तयार केल्या होत्या.

सहभागी विद्यार्थी संख्या - ३२.

छायाचित्रे

निष्कर्ष: नवउद्योजक या स्पर्धेमध्ये विद्यार्थ्यांनी अतिशय उत्साहाने सहभाग घेतला. विद्यार्थ्यांमध्ये नवनिर्मितीची प्रेरणा जागृत करण्याचे काम नक्कीच या उपक्रमच्या माध्यमातून साध्य झाले. उद्यमशीलता व प्रयोगशीलता व व्यक्तिमत्व विकास या घटकांवर निश्चितच प्रकाश पडला.
